INTRODUCTION

Online Cook Book –

This Website is create for all cooker/chefs/mother. We want to make cooking become more simple and easy by online recipe. We welcome user share your recipe to our Website

CONTENT

This website will contain the following pages：

Login Page – Insert you username and password to login.

Register Page – Insert you information to create an account in our website

Home Page – With a Slide show below navigation bar, All Recipe below the Slide Show.

User Profile – Show User Information.

Search Result – It will display the result what you search.

Upload Page – Insert your Recipe and upload to our database share with other user.

Category Page – It display all the recipe in this category.

View User Post Page – It display all the recipe of this user.

All this page hyperlink will be show at the navigation bar of each page, including the Search Function.

PLANNING

WBS

Phase	Activity	Details activity	Time required
Planning	Concept	a) Identify the topic and concept of the main page. (Login ,Register, Home, Admin) b) create ERD and identify which is needed in database c) create database and table	3days 2 2
	Project plan	a) WBS b) predict days may take to finish c) Gantt chart	1 2 2
	Design and identify sub-page	a) draw Main page design (Login, Home, Register) b) identify sub-page (View page, Upload page, Edit page, Search)	5 5
Processing	Process Flow	a) draw the process flow connection between page b) identify function needed	8 5

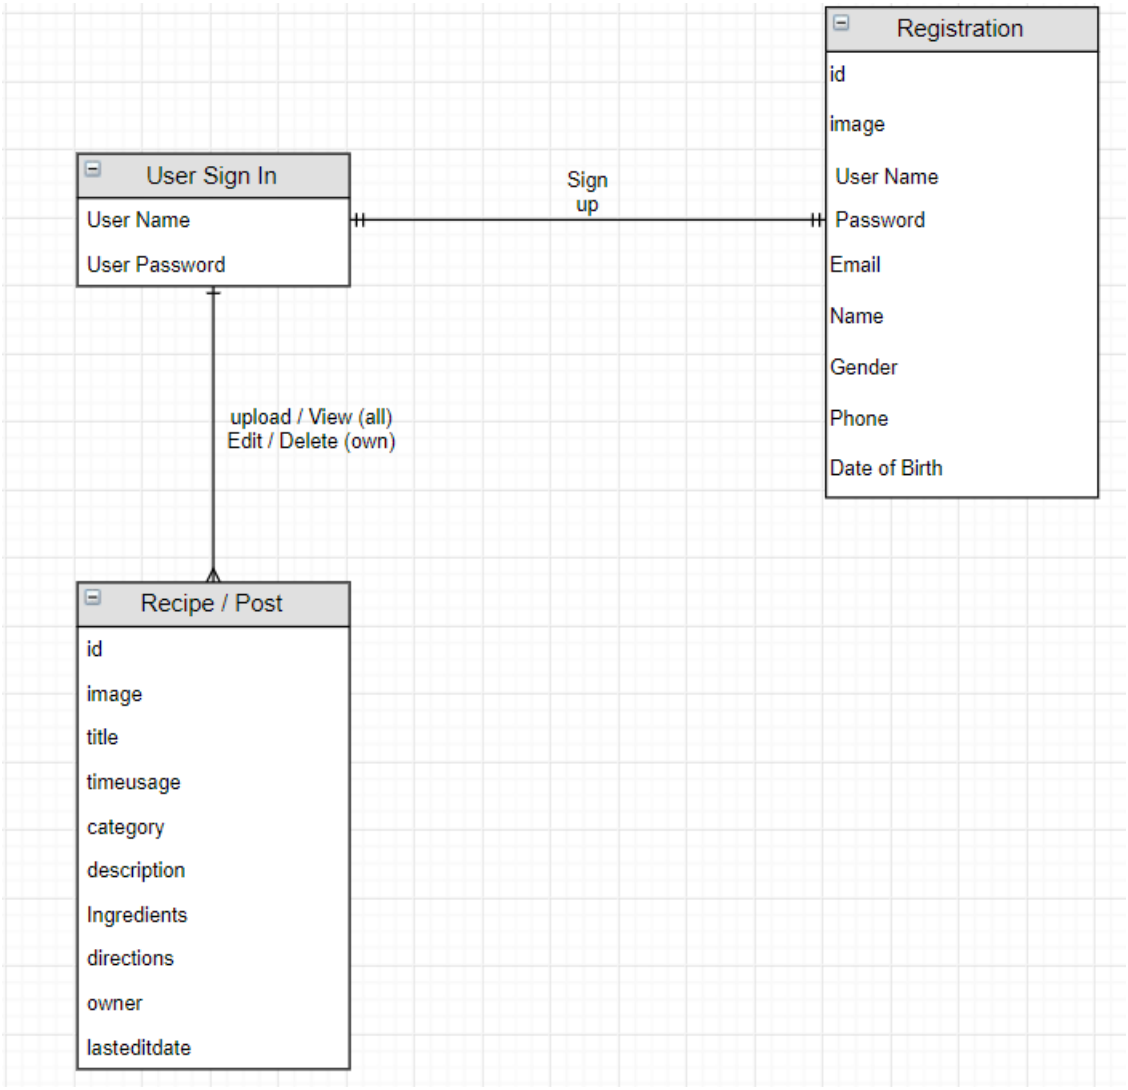
Programming	Main Function	a) Create Main Function of Main page(Login, logout ,Upload) b) Finish the following function (Select form database for output) c) Create search function base on Select	5 5 5
	Sub Function	a) Create Sub Function (Edit(Update), Delete) b) Create primary key for Edit, Delete Function) c) Combine Edit, Delete function to Main Function	8 5 10
Testing	Run page testing	a) find and identify error b) fixing bug c) retest entire process till no error	5 5 5

GANTT CHART

ENTITY RELATIONSHIP DIAGRAM

USER ERD

It is the logical diagram show how our user connect to our database



ADMIN ERD

It is the logical diagram show how our Admin connect to our database

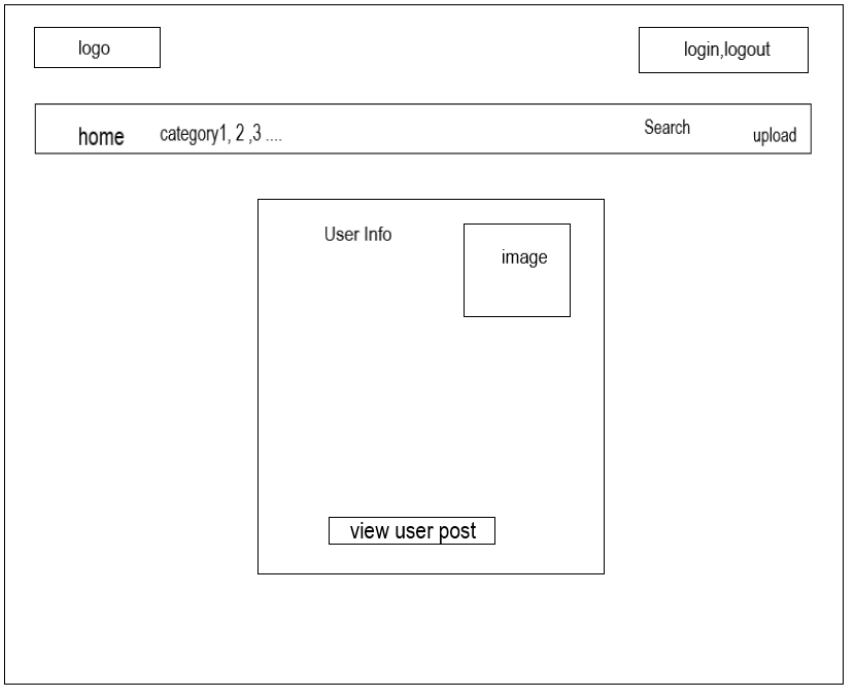
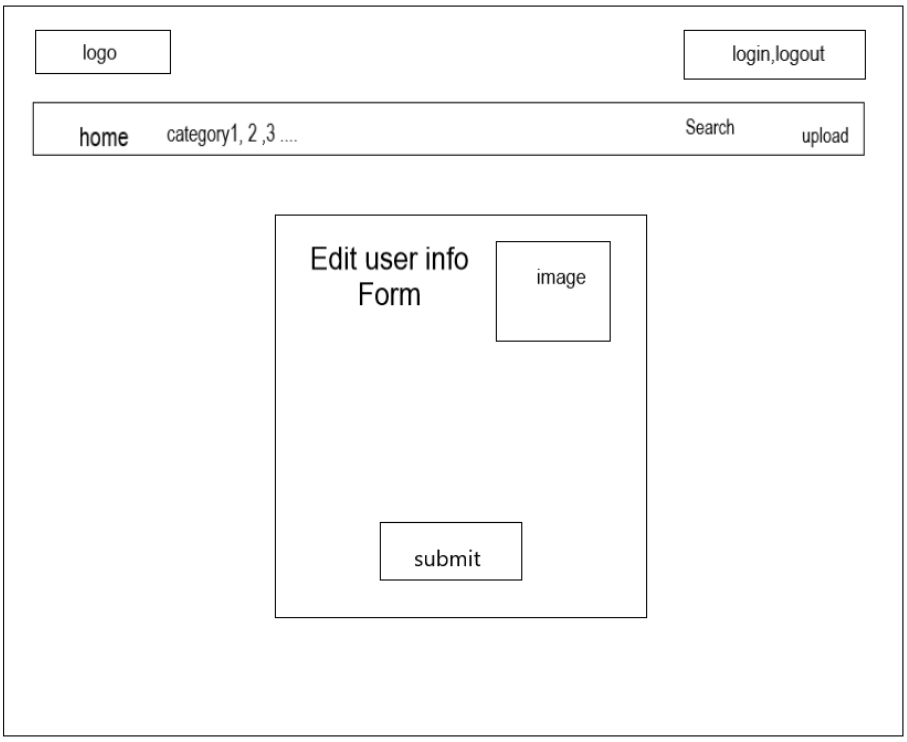
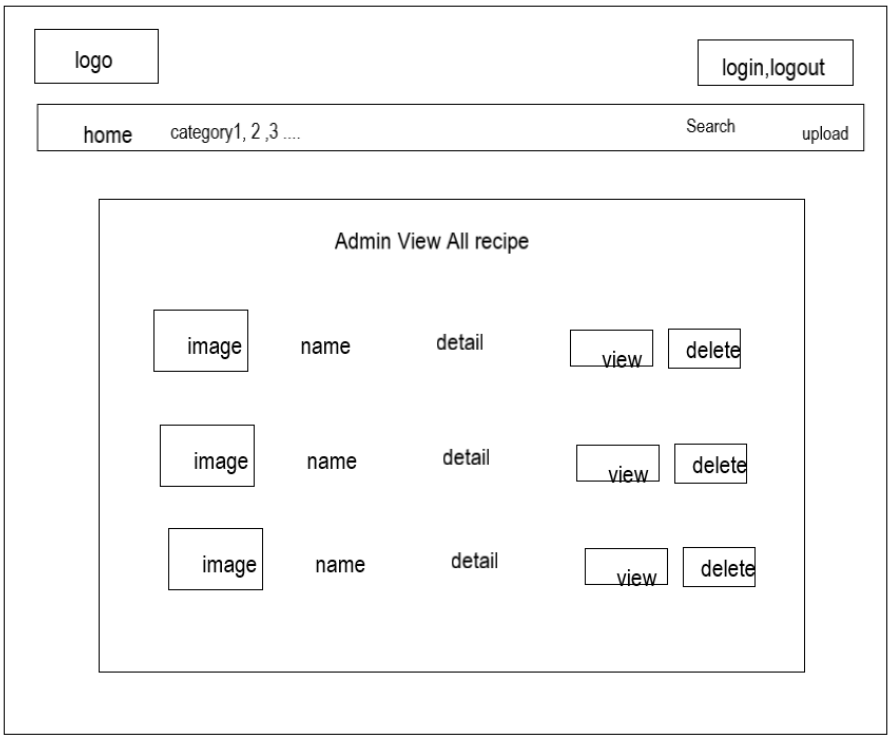
USER INFO



EDIT USER INFO

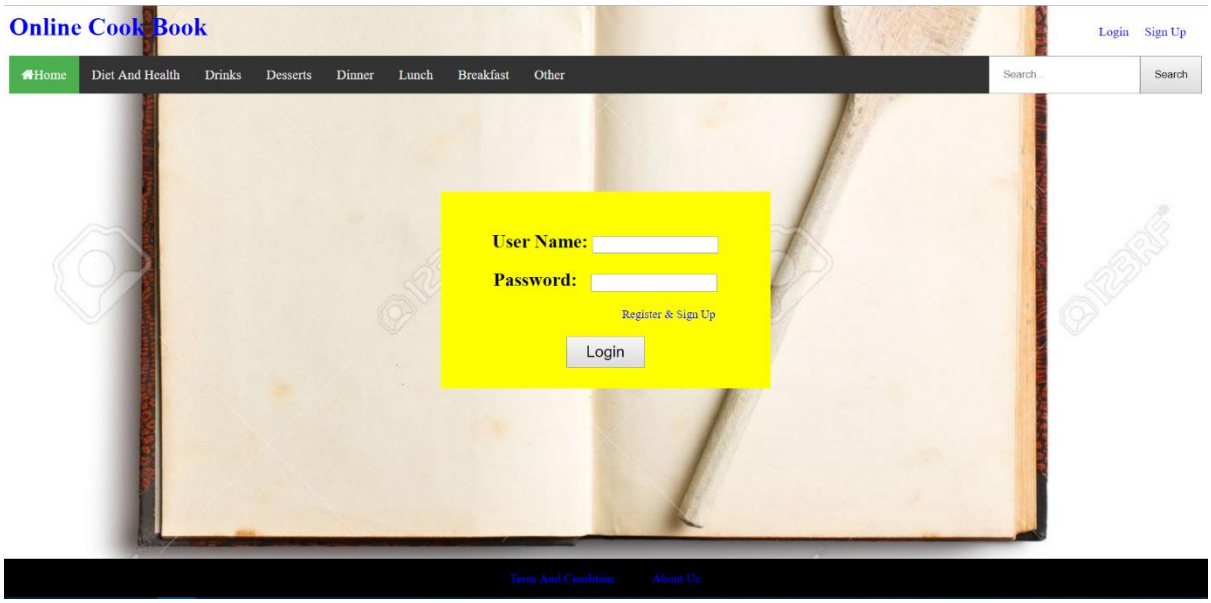


ADMIN VIEW LIST



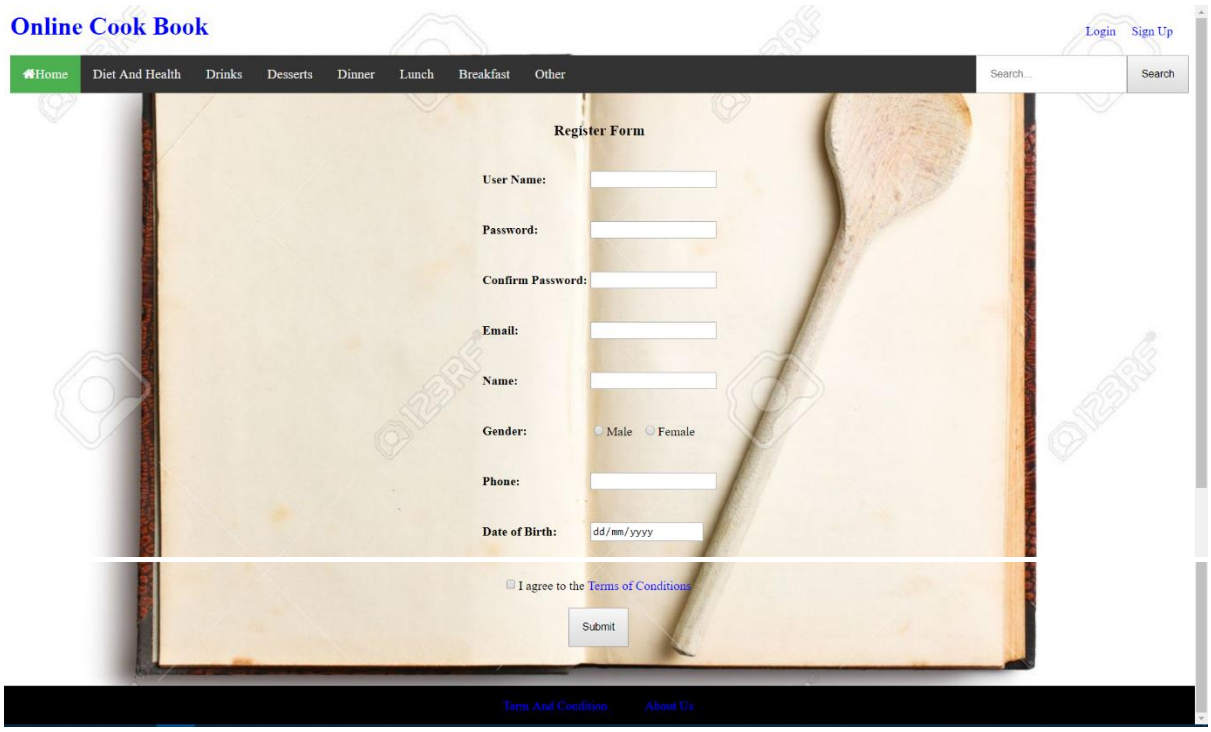
WEB INTERFACE AND USER MANUAL

LOGIN



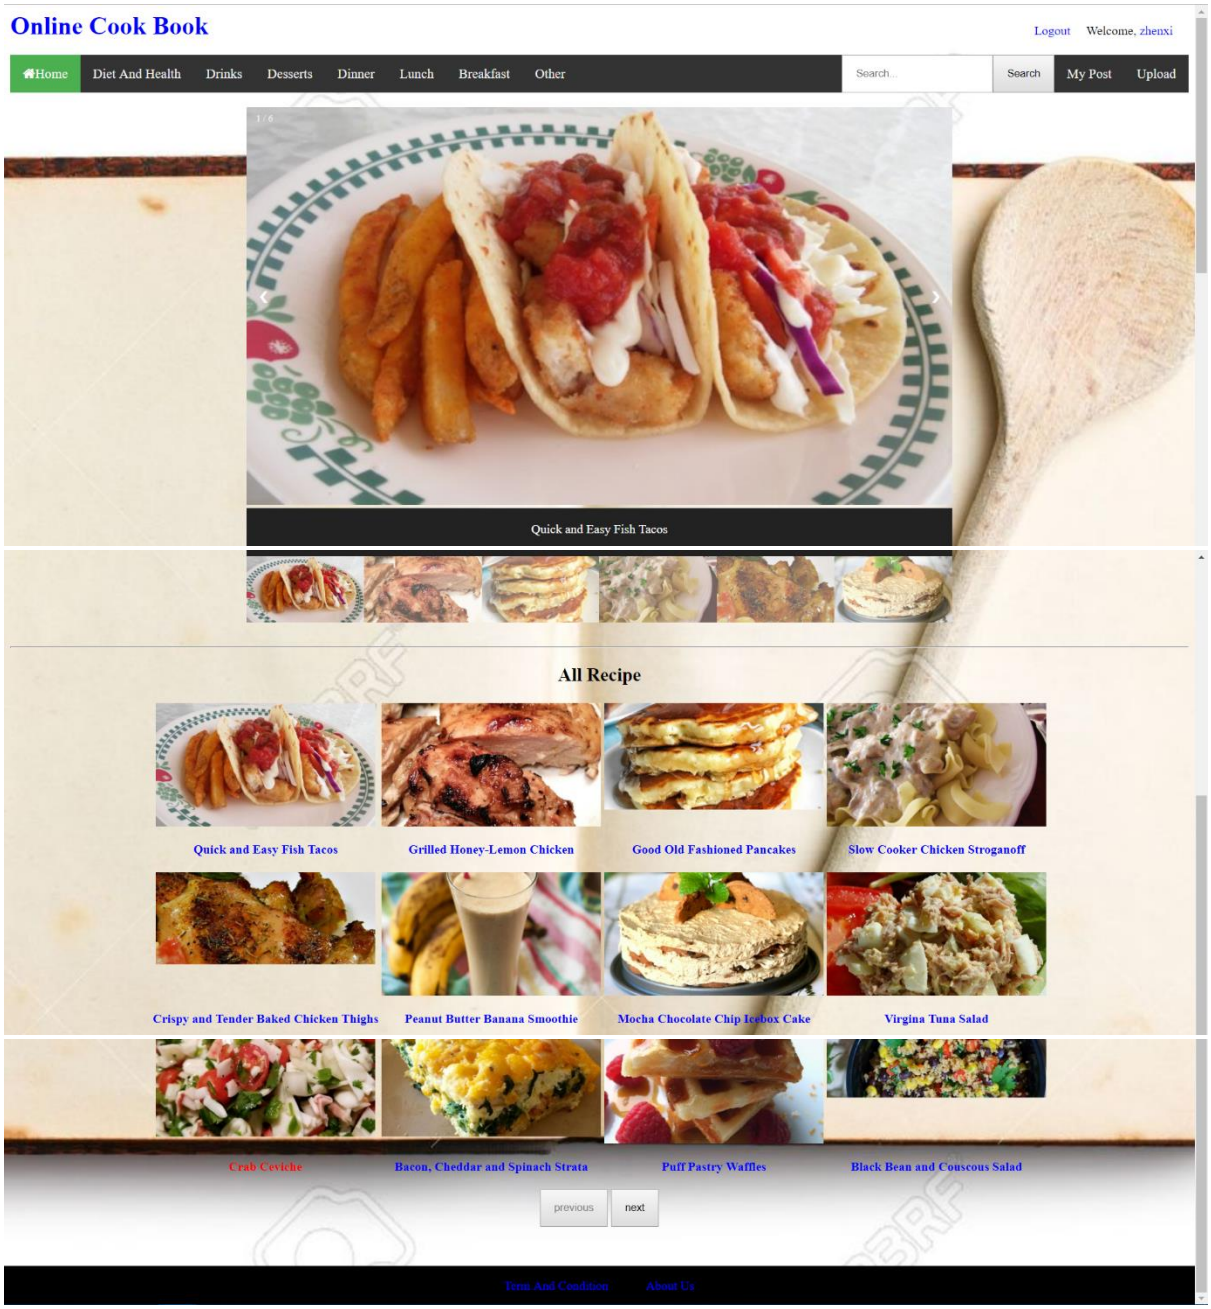
For User insert Username and Password to Login

REGISTER



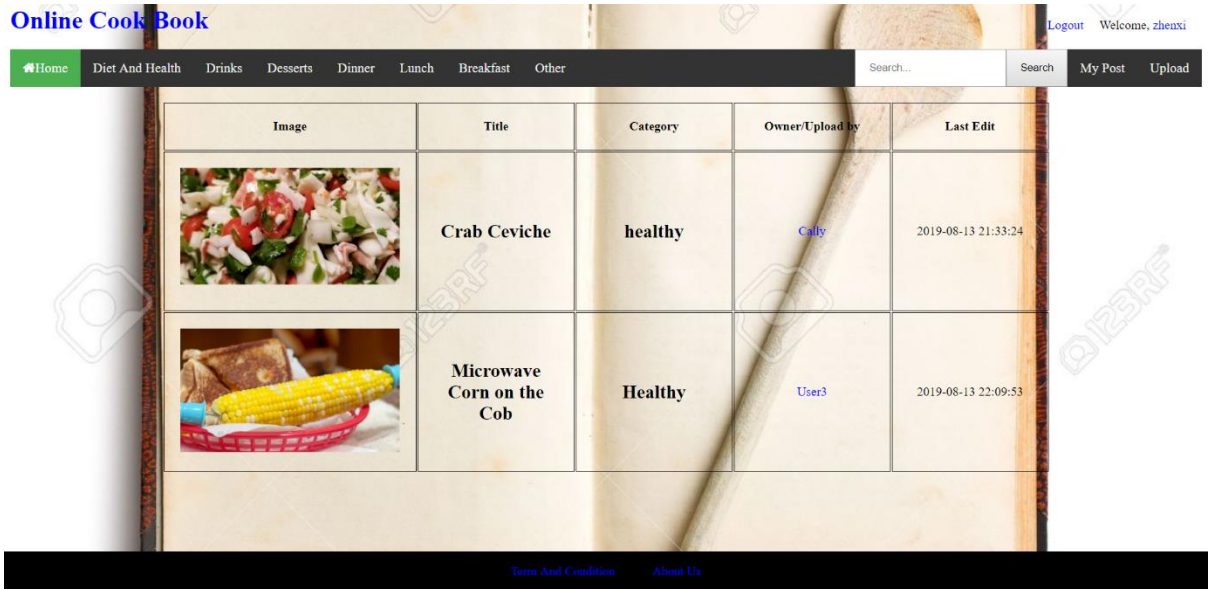
For User register account to our Website

HOME PAGE



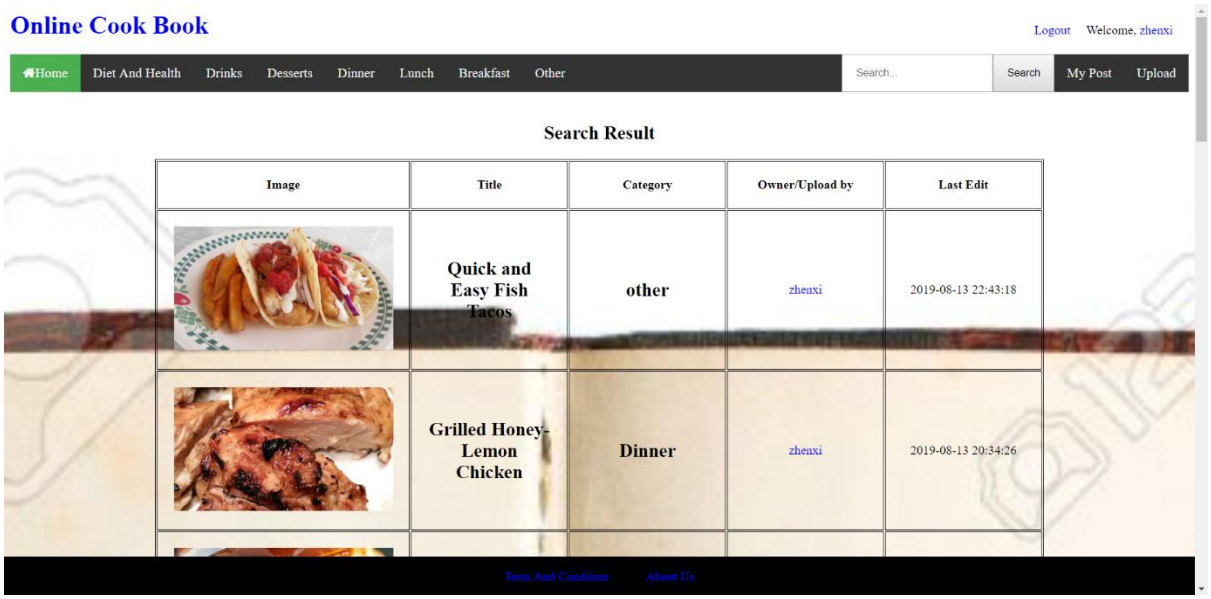
It is the Home Page of our Website with a slide show and all recipe in our website

CATEGORY



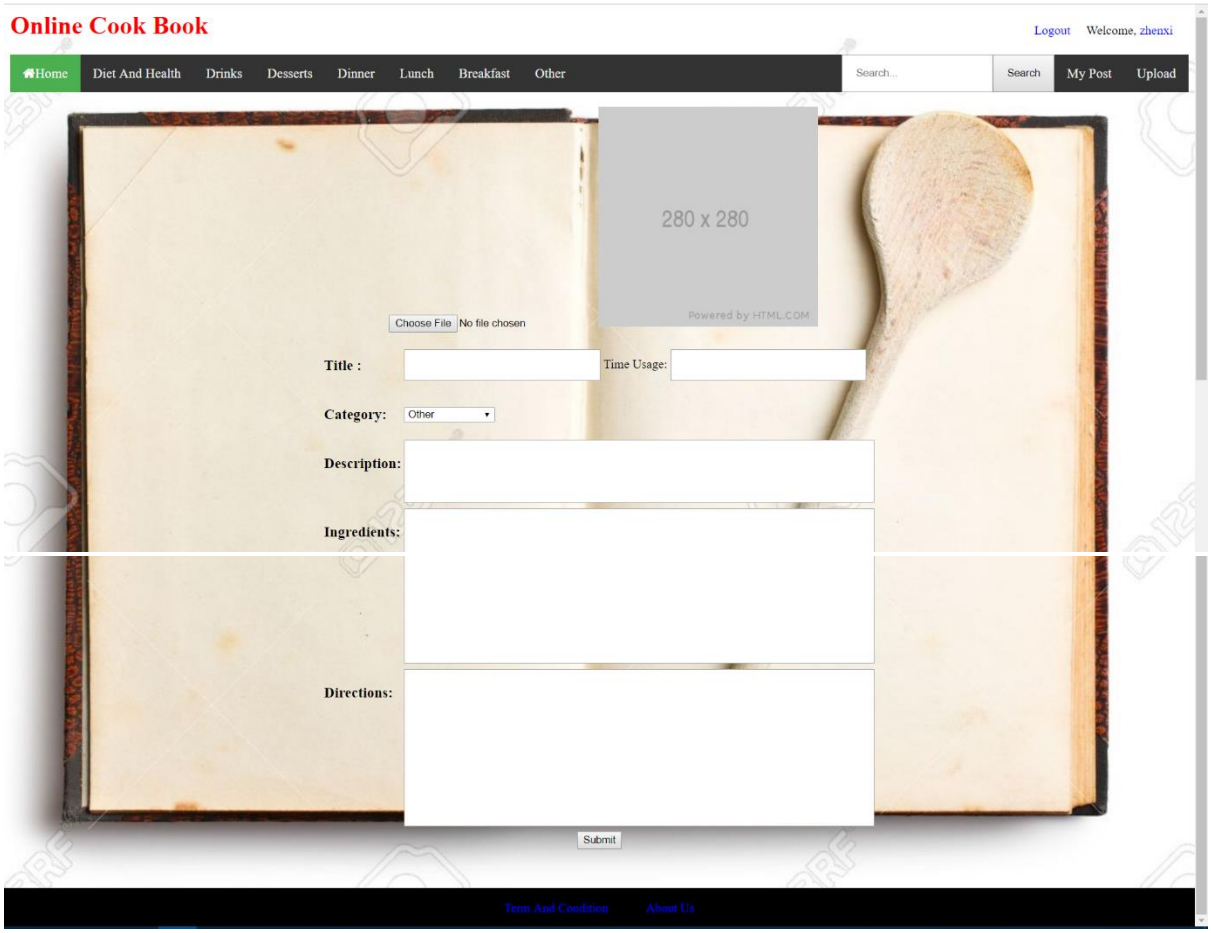
It will just display the selected Category Recipe

SEARCH RESULT



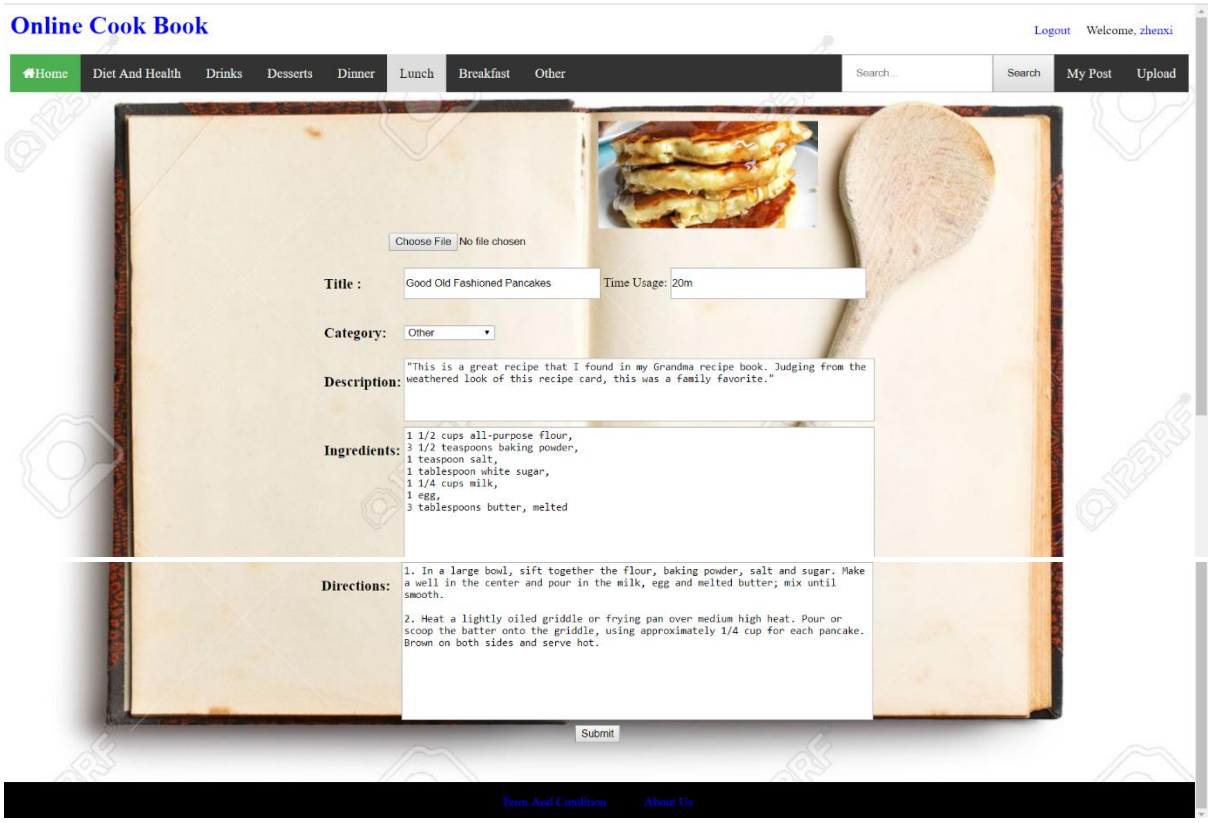
It is the page that you have pressed search button and show the search result you have input in the Search Field (if didn't fill in the Field and press Search it will display all Recipe)

UPLOAD RECIPE



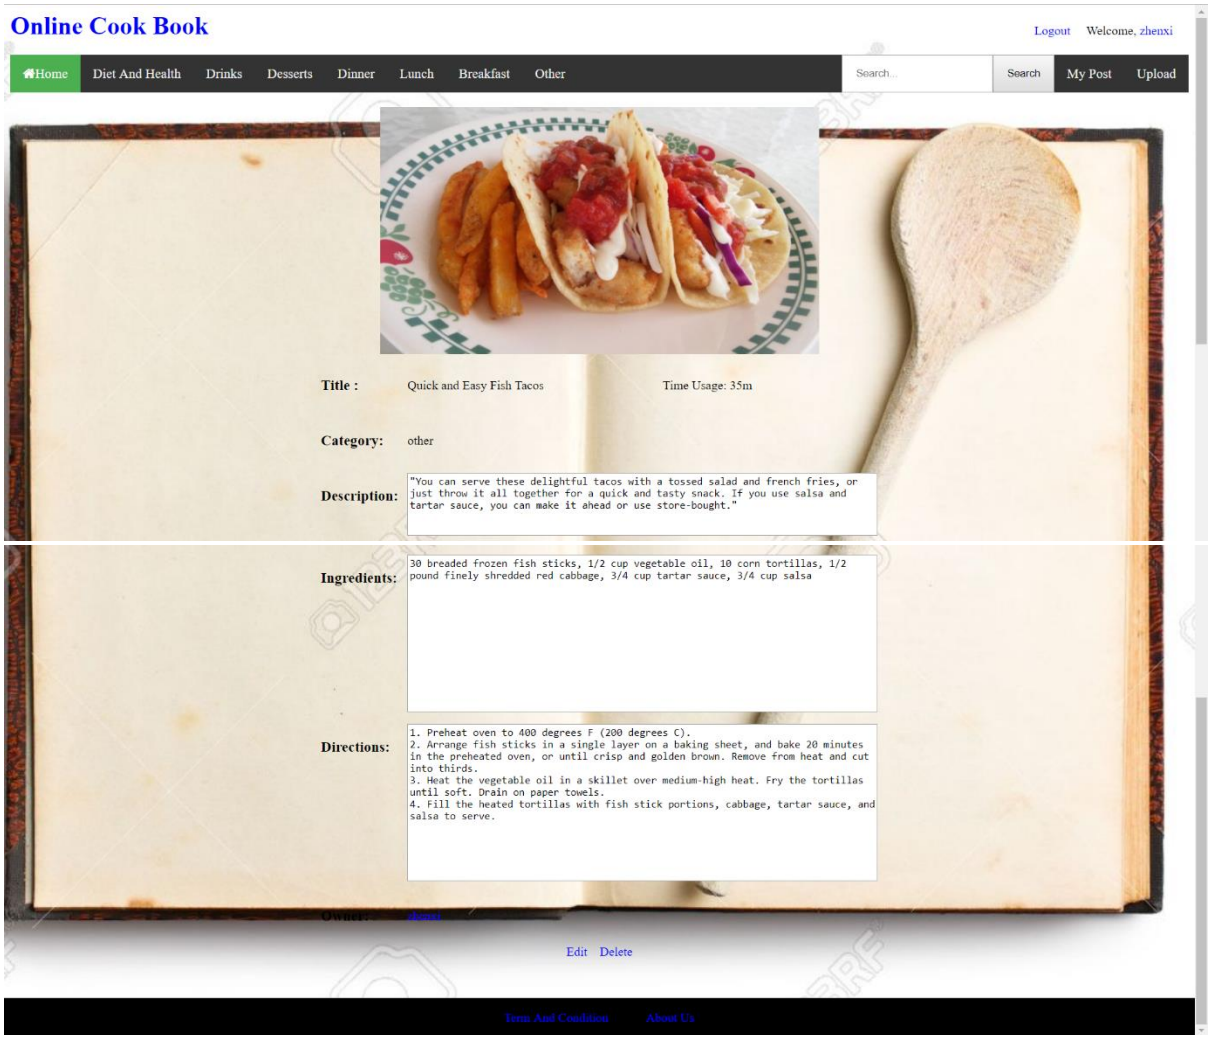
This Page is For User upload Recipe with following data and image.

EDIT RECIPE



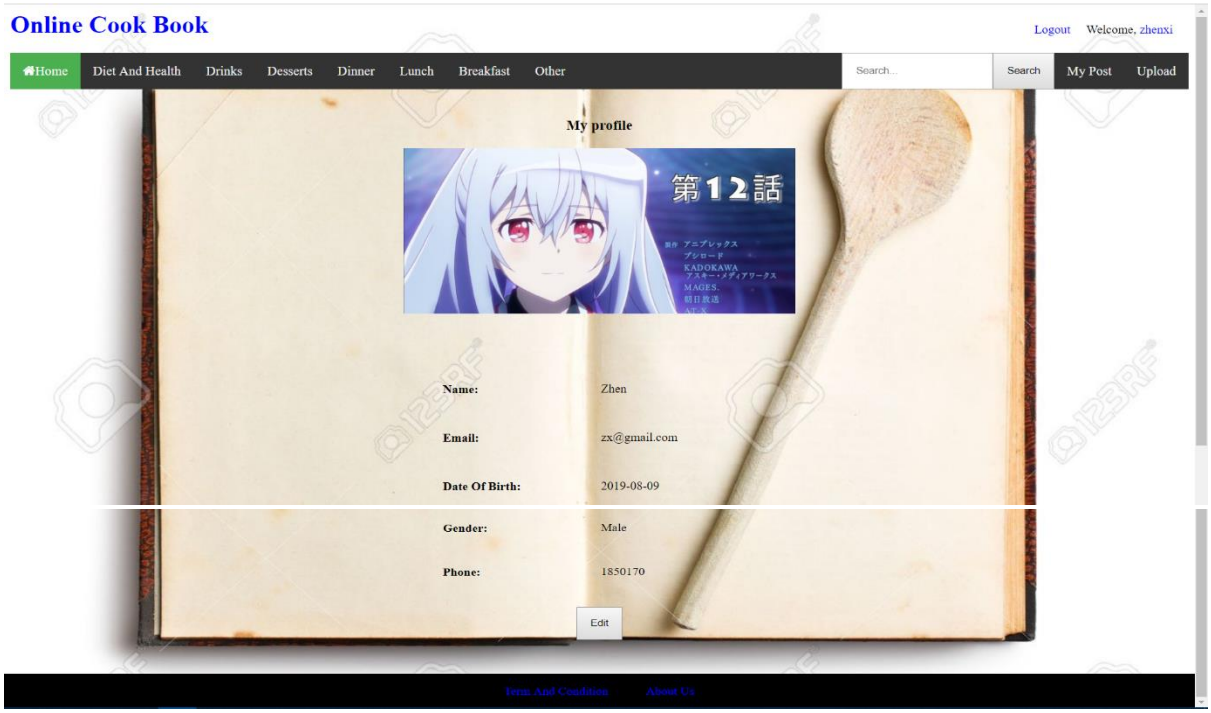
It is the page that user need to edit or update information of them own Recipe.

VIEW RECIPE



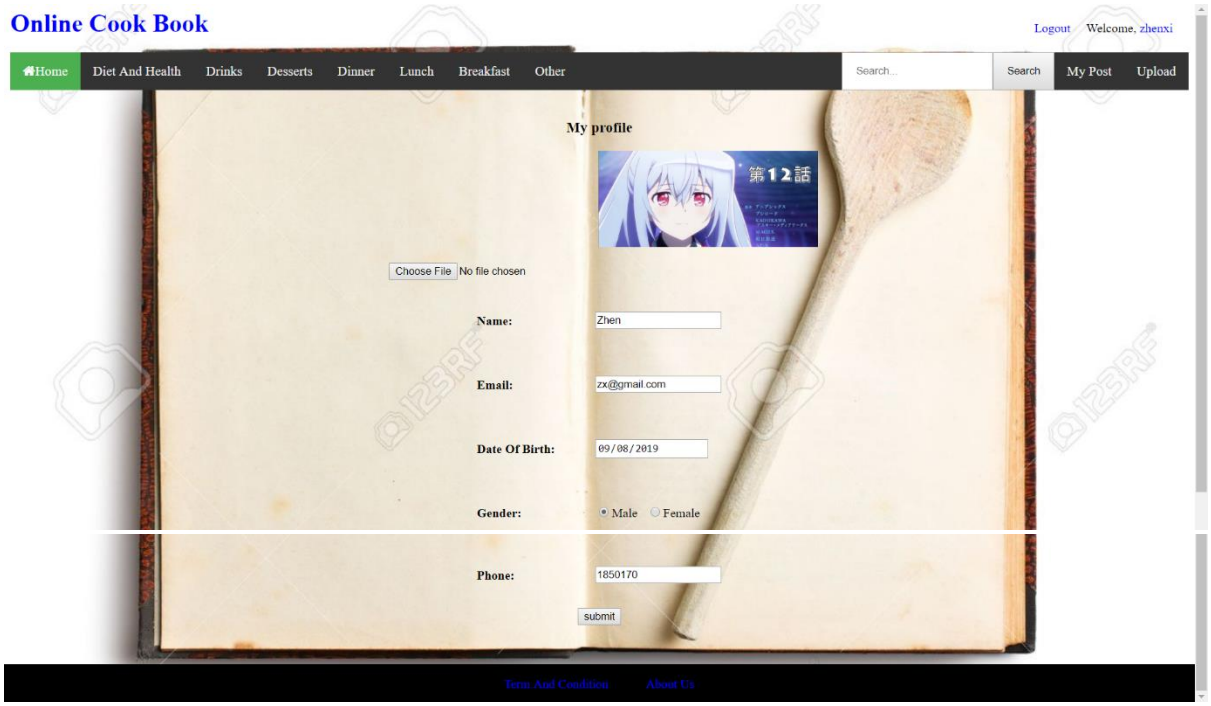
It is the Display when user click on the selected recipe.

USER PROFILE



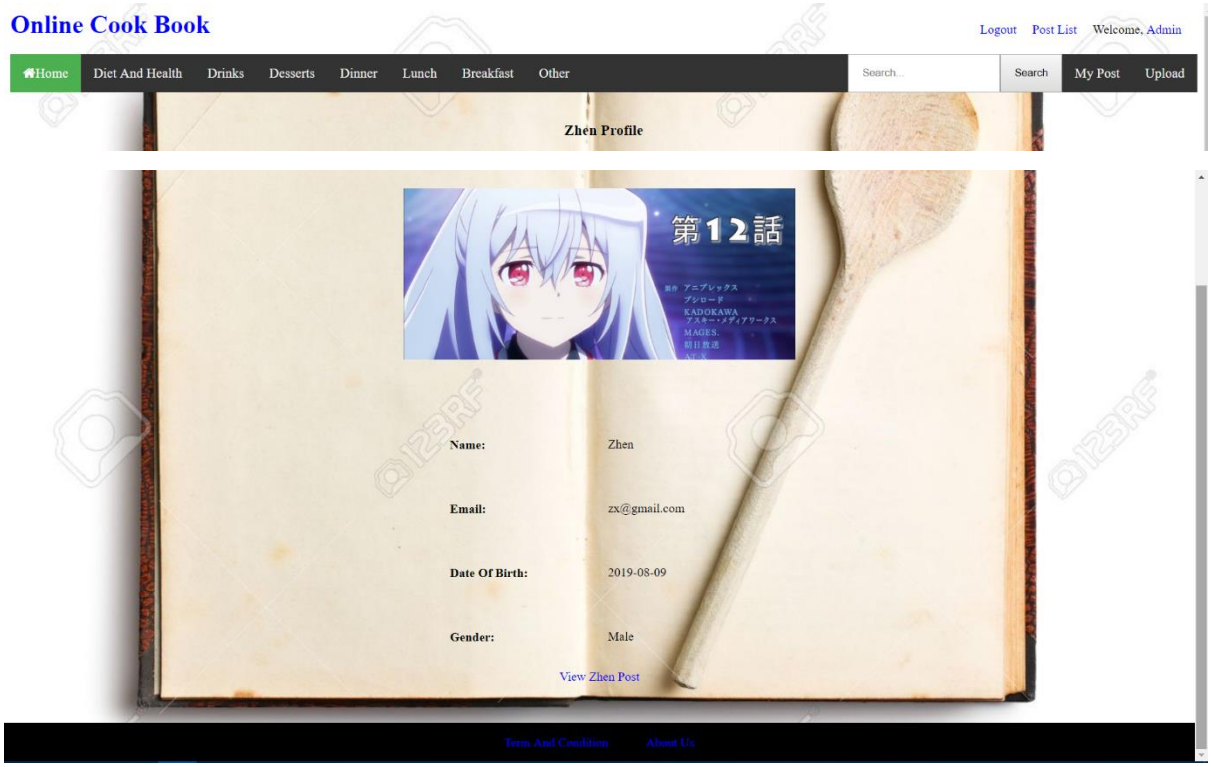
This page display the own user information

EDIT USER PROFILE



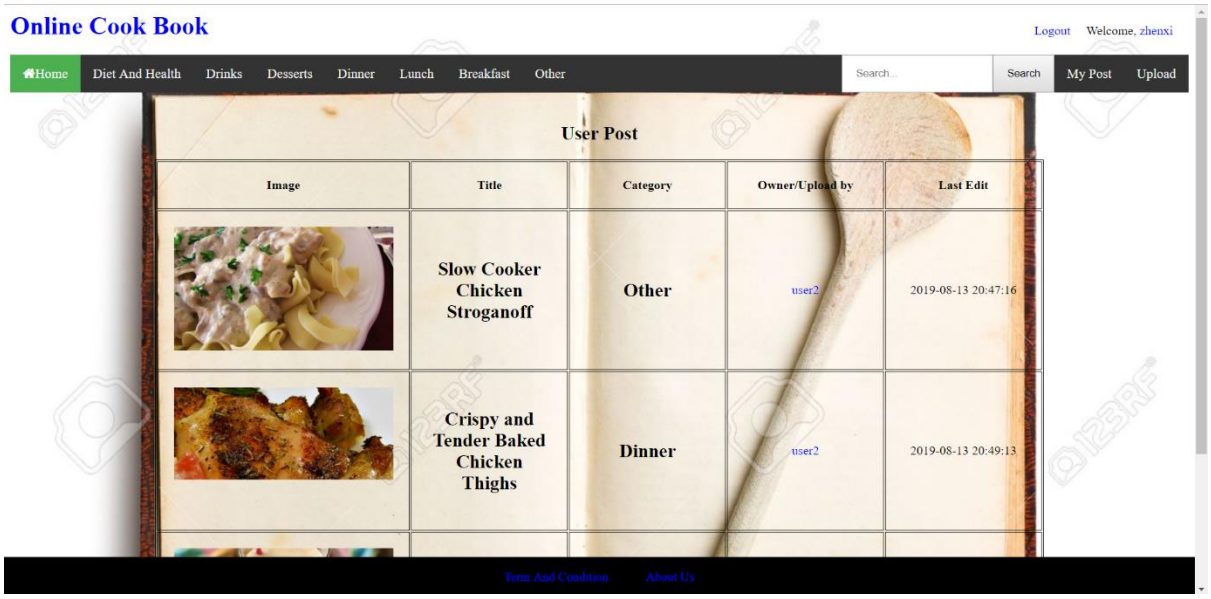
This page for user update the information.

OTHER USER PROFILE



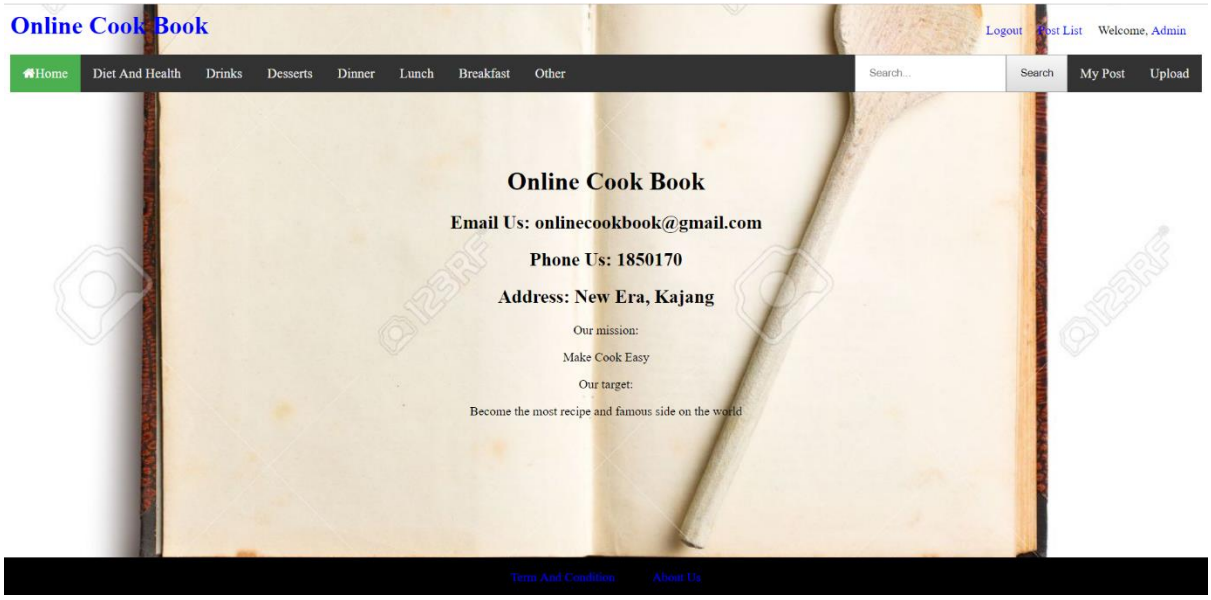
This page show the selected user profile and an extra button to view this user recipe.

VIEW USER RECIPE



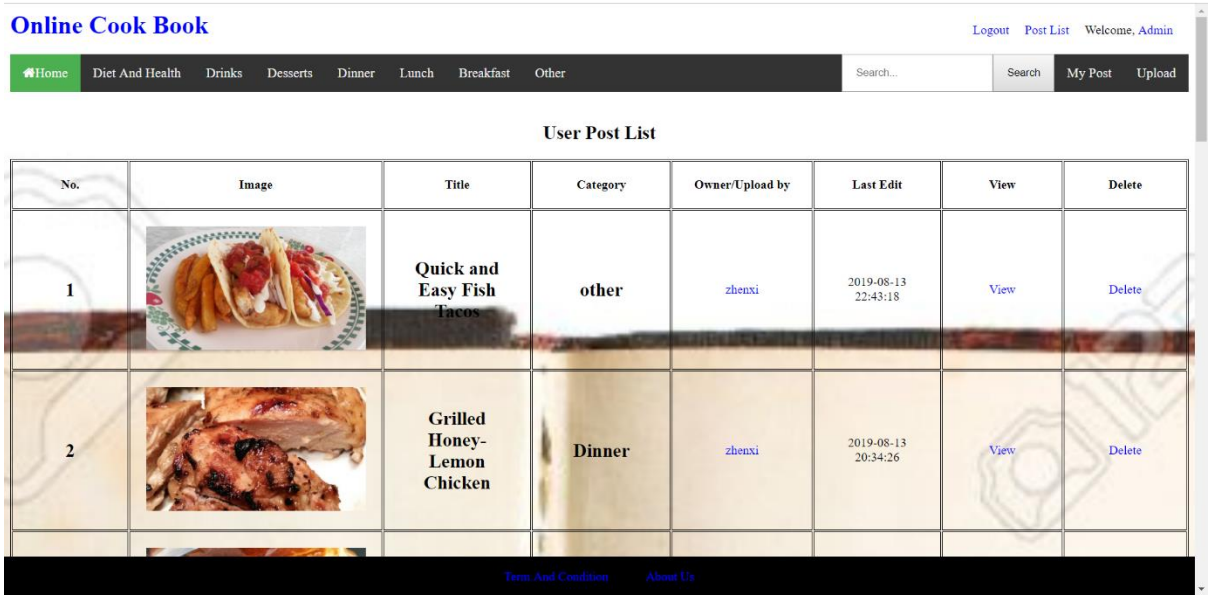
This is the result of the View user post on last page(Other User Profile).

ABOUT US



This page show our Website information, mission and target.

ADMIN VIEW RECIPE LIST



This Page is Only Admin can View. It have all recipe of every user and Admin allow to edit and delete those recipe.

```

CONCLUSION

Our Website is designed based on easy to user use and share. We have use a lot of PHP Code to create connection to database let user can easily upload recipe and view all the recipe. And we also use CSS to design our website look nicely, make user feel comfortable.
